

DURA GRIP META

Duragrip Meta protects the floor and the environment.

Sizes:

90 cm × 120 cm
110 cm × 120 cm
130 cm × 120 cm
150 cm × 120 cm
180 cm × 120 cm
Special sizes up to 200 cm

Thickness:

1,8 mm

Colour:

transparent

Material:

[PET] polyethylene terephthalate,
[PUR] polyurethane

Surface:

structured

Bottom:

VAB®-antiglide layer

Fire behavior:

flame retardant
Bfl-s1 (DIN EN 13 501-1)

Optimizing instead of renovating

The environmentally friendly and recyclable Duragrip Meta skilfully polishes the floor in your office or at home. Unpleasant scratches or stains on the floor are concealed. Duragrip Meta can also be seen on a new, high-quality floor covering: The optically crystalline structure convinces with high light transmission and crystal-clear transparency.

In addition, Duragrip Meta is characterized by ecological properties: environmentally friendly in production, reusable as often as required. Thanks to its recyclability, this floor protection mat helps to protect important components of our time: the environment and valuable resources.

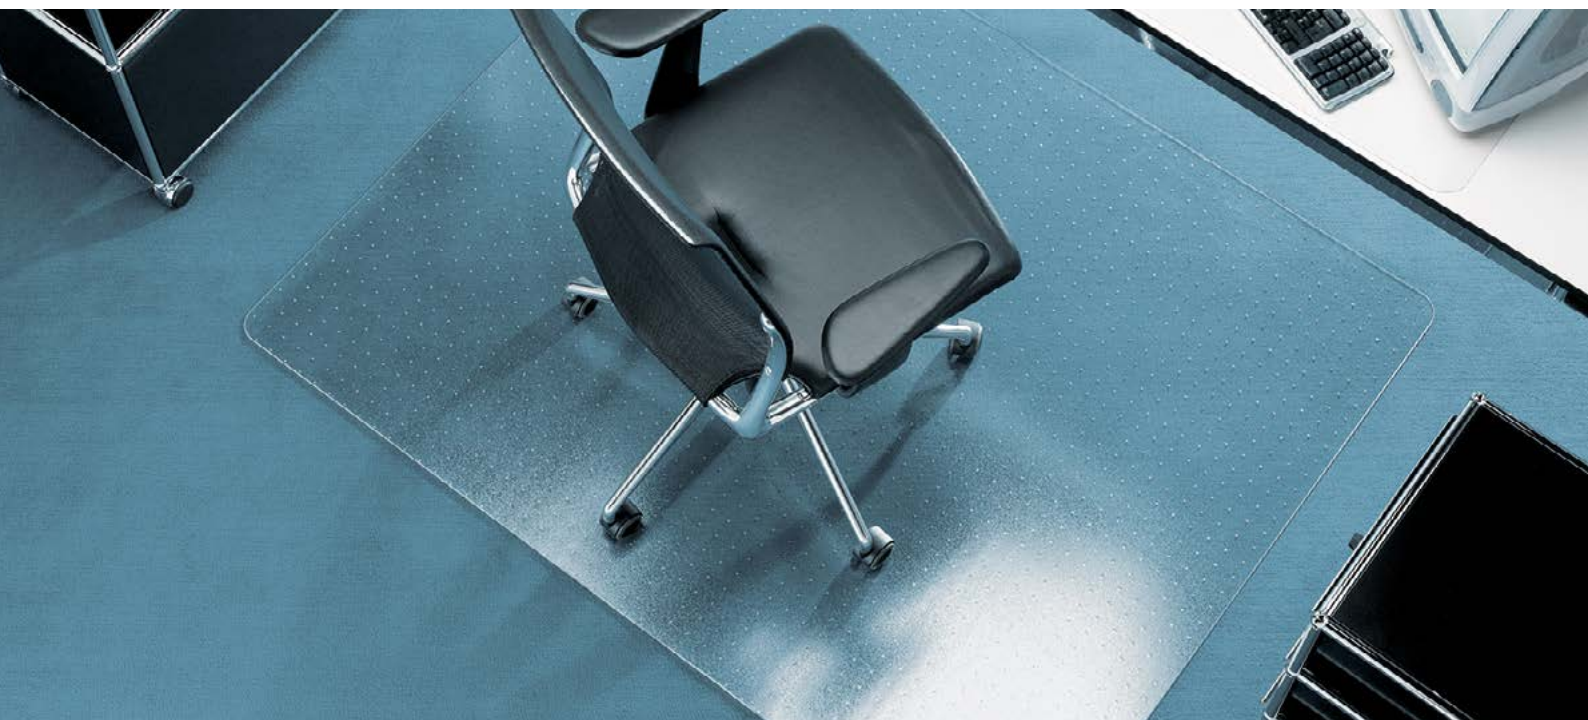

In addition to the ecological aspect, Duragrip Meta offers many other positive properties. For example, it is characterized by very high impact and break resistance. It is also free of harmful plasticizers (e.g. bisphenol A) and odorless. Besides a first-class chemical resistance to acids, various solvents, alcohols, salts and plasticizers, it is also resistant to oils, greases and fuels.

Furthermore it has a high dimensional stability and the properties of a high abrasion resistance and a low sliding resistance.

Furthermore it has a high dimensional stability and the properties of a high abrasion resistance and a low sliding resistance.

DURA GRIP META

The office chair glides perfectly – both over hard floors and carpeted floors. On hard floors, the high-performance, thermally welded VAB®-antiglide layer ensures that the mat cannot slip. On carpeted floors, blunt anchor studs provide grip by digging into the soft pile.

For carpets with anchor grips

For hard floors with VAB®-antiglide layer

Abstract

- protects floor, the environment and resources
- very high impact and break resistance
- free of harmful plasticizers (e. g. bisphenol A)
- structured surface
- resistant to chemical agents, oils and greases
- high dimensional stability and abrasion resistance
- low sliding resistance
